INTRODUCTION

This handsome Georgian Revival building in the Village of Maywood was built by the Ladies of the Grand Army of the Republic in 1924. It was designed by Francis E. Dunlap and exhibits simple red brick, 2-story facades with Classical detailing and a screened portico facing the Des Plaines River. Vacant since a minor fire in 2003, it has been owned by the Village since 2008.

At the urging of the Maywood Historic Preservation Commission, the Village sought redevelopment proposals, but none came to fruition. Due to concern that the building would deteriorate and may be demolished to make way for new development, a group of citizens nominated the building to be listed on Landmarks Illinois’ annual statewide “Ten Most Endangered Historic Places” list in 2012. That same year through its Preservation Heritage Fund Landmarks Illinois offered financial assistance to the Commission to purchase paint and supplies for the front portico. In 2014 Landmarks Illinois offered to produce a reuse study and redevelopment plan for the site.

Maywood has a long history of caring for veterans and their families. The Hines Veterans Administration Hospital is an important presence on Maywood’s western border. The Maywood Soldiers’ Widows Home was founded in 1912 and was first located in a large house before moving to this building in 1924. The Home was sold to private owners in the 1970s who used it to house adults with mental illness. While its history is a residential facility, the Village instructed Landmarks Illinois to demonstrate the building’s viability to house a commercial use.

Despite the Village’s willingness to see the Home adaptively reused, it has been difficult for the Village to attract imaginative proposals that would be financially successful. Because adjacent vacant land has been marketed separately from the Home, it has been more challenging to attract developers to the Home’s smaller site. The exterior appearance of the Home has lead perspective buyers to question the condition of this otherwise structurally stable building. However the Village and community volunteers continue to monitor and maintain the building with continued hope to see it reused.

Rehabilitation and reuse of historic buildings can be successful with factual marketing of the benefits of historic preservation incentives for a developer, as well as potential benefits to a community. As historic rehabilitation is inherently more labor-intensive than new construction, the Village could promote the employment of local construction trades to participate in the rehabilitation of the Home.

With our consulting team, we believe that due to the building’s layout and location, an office or medical office conversion would offer an excellent reuse opportunity for the Soldiers’ Widows Home. We encourage the Village of Maywood Trustees and Village staff to market the Home together with the adjacent land at 1st Avenue and Lake Street for reuse and redevelopment. Incorporating this important piece of Maywood’s history into the redevelopment of this highly visible intersection could be very impactful for both the surrounding area and the Village as a whole.

This study focuses on four key opportunities to attract developers:

- To market the Home with the adjacent vacant land as one comprehensive redevelopment site, allowing the Home’s reuse and new construction on the vacant land to share access, parking and financing.
- To market the Home as an excellent candidate for office/medical office conversion.
- To market the Home as eligible for listing in the National Register of Historic Places, which would allow a developer to utilize the Federal 20% Historic Tax Credits.
- To market the Home as eligible for local Landmark designation, which would allow a developer to utilize the Cook County Class L Property Tax Incentive.

Information on these incentives can be found on page 19 of this study.
The Maywood Soldiers’ Widows Home was designed by architect Francis E. Dunlap and built in 1924. Dunlap executed an elegant Georgian Revival-style building in red brick with Classical detailing and a distinctive two-story front portico facing 1st Avenue and the Des Plaines River in the distance. The vertical mass of the porches is reinforced by four sets of double columns. The first floor windows are 6 over 6 double hung with semicircular arches above. The second floor windows are 6 over 6 double hung with flat brick arches and raised limestone keystones.

The building was designed with fireproof construction between individual sleeping rooms, which are located on part of the first floor and the entire second floor, with shared bath facilities. The remainder of the first floor is comprised of a large formal parlor with French doors and woodwork, an adjacent dining room, kitchen and office.

Dunlap was a native of Maywood, received a degree in architecture from the University of Illinois-Urbana and after living in Chicago to begin his career returned to Maywood to marry and raise his family. He was an active citizen of Maywood, having served on the Village Board and library board and in many social clubs and community activities. He designed several Maywood buildings in addition to the Maywood Soldiers’ Widows Home, including the former Maywood State Bank, the Moose Temple, a funeral home and several apartment buildings, as well as others in Chicago. He received an honorable mention for his submittal to the Chicago Tribune Tower design competition in 1922. In 1927, Dunlap died unexpectedly of pneumonia at the age of 32. The Maywood Herald reported that Dunlap’s was one of the largest funerals on record in the Village and all offices in the village hall were closed on that day in respect for the man who had contributed so much to the community.

Dunlap’s client for the Maywood Home for Soldiers’ Widows was the Daughters of the Union Veterans, which was endorsed by the Grand Army of the Republic (GAR), who wanted a large new facility to house the widows and children of Union Civil War veterans. Upon being built in 1924, the Home would replace a previous facility known as the Logan Home in the former house of Col. William Nichols, the founder of Maywood. The GAR and its affiliate women’s organizations were prominent advocates for veterans of the Civil War and their families.

To have qualified for residence at the Home, a woman had to be at least 60 and a member of the Daughters of the Union Veterans, the Loyal League or the Ladies of the Grand Army of the Republic.

At the laying of the building’s cornerstone in 1924, it was stated by Mrs. Lizzie Field, president of the Maywood Home for Soldiers’ Widows’ association, “When they were young and life was sweet and hopes were high they had courage to embrace their men and send them to die with that army in blue which sixty years ago stretched itself across the continent and fought that this country might not become ‘a house divided against itself.’ When they are old and the twilight gathered and they had no high hopes and ambitions are not as great as they were, after they have served their country by giving their all and are poor and helpless, left to live alone in basements and hovels, in penury, utter poverty and woe, is the time to show them that they have not been forgotten.” (Maywood Herald, May 2, 1924)

By the late 1970’s, the Home closed after its last residents died or were moved to nursing homes and was sold to private owners, Mr. and Mrs. Golton. In response to passage of the Mental Health Reform Act, the Goltons renamed the building Firstwood, and offered room and board to people with mental illness. A small kitchen fire closed the facility in 2003.

For 90 years, this building has represented Maywood’s long commitment to caring for its veterans – the Village was founded by a Civil War veteran, the proximity of Hines VA Hospital has encouraged a special relationship with the community, Maywood was the single most impacted community by the Bataan Death March and continues to this day to commemorate those soldiers and the ones who have come after them.

Due to its historic significance, the Maywood Soldiers’ Home was determined eligible for listing in the National Register of Historic Places by the Illinois Historic Preservation Agency. (See p. 19)

MEDICAL OFFICE USE OF THE SOLDIERS’ WIDOWS HOME WOULD BE ADVANTAGEOUS TO HEALTH PROFESSIONALS ASSOCIATED WITH ANY OF THE NUMEROUS HEALTH FACILITIES IN THE IMMEDIATE AREA.
PIN:
15-11-131-011-0000 TO
15-11-131-018-0000

PROPERTY AREA DESCRIPTION:
The Village’s site is a gateway to the community and is a highly visible site in the region. Parcels are located in the St. Charles TIF District and Enterprise Zone.

PROPERTY DETAILS:
PROPERTY AREA: 1.52ac
BUILDING AREA: 12,280sf
CURRENT BUILDING USE: Vacant Lot/Bldg
YEAR BUILT: 1912
NUMBER OF STORIES: 2 + Basement
ZONING: C-2; Pedestrian-Oriented Commercial
ENVIRONMENTAL: Phase 1 complete
EXISTING CONDITIONS

Based on visual inspection, the consulting team for this report felt that despite the building’s deteriorated appearance, the basic structure is sound and in need of what appears to be only minor repairs due to the sturdy concrete construction. A new roof with masonry repairs and tuckpointing will provide decades of service to the new users.

The building’s exterior walls are loadbearing solid masonry with the interior of the building supported on concrete columns and beams that define an interior corridor. The floor and roof structure are a composite system of clay tile and reinforced concrete. This fireproof structural system is in good condition and in need of minor repairs.

David Hrbel & Phil Hamp of Vinci Hamp and Christopher Payne of Sullivan, Goulette, & Wilson examining the existing building.
This study’s recommendation is to convert the Soldiers’ Widows Home to an office or medical office building. The existing central corridor allows a simple and efficient space configuration. The proposed conversion can be integrated into a development for the 1st Avenue and Lake Street redevelopment site.

The existing masonry building is in sound condition despite its weathered appearance.

The signature existing entry portico on the east side of the building will remain and be restored and a new accessible entry will be built on the west side of the building, convenient to the new parking.

New roof, masonry repairs, and tuckpointing will stabilize the existing structure. While new and/or repaired windows and insulation will help with energy efficiency.

These proposed plans have been shared with the Illinois Historic Preservation Agency (IHPA), which administers the Federal Historic Tax Credit Program. Initial review of these plans was positive but not final regarding their compliance with the National Park Service’s Secretary of Interior Standards, as is required to qualify for the historic tax credits. The plans, with or without amendments, would need additional review by the IHPA.
The original stair in the east side of the building will be reused. The existing concrete fire stair in the southwest part of the building will remain and be modified to meet current codes. A new interior stair will be constructed to take the place of the existing exterior stair and fire escape on the north end of the building.

CONCEPT:
Renovate/restore existing building into a professional office or medical office building.

PROGRAM:
1. Provide on site convenience parking
2. Provide new at grade entry vestibule
3. New stair and elevator provide accessible access to the first floor reception
4. New reception area, waiting room, conference room and toilet rooms will serve all medical professionals and their clients

RECOMMENDATIONS:
A. Restore existing two story portico
B. Tuckpoint exterior
C. Provide new roof and insulation
D. Insulate exterior walls and new windows

DATA:
TOTAL LEASABLE SPACE SQ. FT.: 7,107
TOTAL GROSS SQ. FT.: 14,956
BUILDING REHABILITATION AND REUSE: FIRST FLOOR PLAN, OPTION 2

PROGRAM:
1. Provide on site convenience parking
2. Provide new at grade entry vestibule
3. New stair and elevator provide accessible access to the first floor reception
4. New reception area, waiting room, conference room and toilet rooms will serve all medical professionals and their clients

RECOMMENDATIONS:
A. Restore existing two story portico
B. Tuckpoint exterior
C. Provide new roof and insulation
D. Insulate exterior walls and new windows

DATA:
TOTAL LEASABLE SPACE SQ. FT.: 7,507
TOTAL GROSS SQ. FT.: 14,956
RECOMMENDATIONS

A  Restore existing two story portico
B  New Elevator
C  New Restrooms
D  Rehab existing monumental stair
E  New interior exit stairway to replace existing fire escape.
BUILDING REHABILITATION AND REUSE: BASEMENT

RECOMMENDATIONS

- Extend elevator down to Basement
- Space can be leased or be used for storage for the offices on the upper floors
- Dedicated mechanical and storage for building operations
- Existing crawl space can be used for routing HVAC ductwork and piping
REDEVELOPMENT OF SITE WITH HISTORIC BUILDING: SITE PLAN A

ALL THREE SITE PLAN PROPOSALS ACCOMODATE A NATIONAL RETAILER

1. New one story retail along the south and east sides of the site continuing the small scale commercial fabric that exists to the west
2. Provide setback that matches the Home for Soldiers’ Widows to the north
3. Building at the major intersection creates a strong architectural presence with a gateway feature welcoming visitors to Maywood from the East.
4. At the SE corner provide a plaza that would match the character of the newly installed streetscape along Lake St.: Opportunity for local artists or school children to provide public art and hold community events like concerts and markets
5. Parking would be screened completely from 1st Ave and Lake street and accessed from 2nd Ave.
6. Direct pedestrian access connects retail spaces to Home for Soldiers’ Widows Medical Office Building.
7. Retail spaces can directly support the medical office building
8. Vacated alley
9. The east side setback would be large enough for outdoor dining patios

DATA:
TOTAL LEASABLE SPACE: 14,046 sq ft
PARKING SPACES: 57
One story retail buildings will be parallel along 1st Ave. and 2nd Ave.
2 Parking court in the middle of the site accessed from Lake St and 1st Ave.
3 Building at the major intersection creates a strong architectural presence with a gateway feature welcoming visitors to Maywood from the East.
4 Suited to mid-sized national retailers that require a strong presence oriented to the parking.
5 Retail spaces can directly support medical office building
6 Direct pedestrian access connects retail spaces to Home for Soldiers’ Widows Medical Office Building
7 Vacated alley
REDEVELOPMENT OF SITE WITH HISTORIC BUILDING: SITE PLAN C

1. Two single-story retail buildings
2. SE corner ideally sized for a national drug store chain with a drive through. Building at the major intersection creates a strong architectural presence with a gateway feature welcoming visitors to Maywood from the East.
3. SW corner would be ideally sized for a national fast casual restaurant
4. Synergies provided by the proposed medical office building in the Home for Soldiers’ Widows and the drug store on the same site provide incentive for them to be developed by the same company
5. Retail spaces can directly support the medical office building
6. Direct pedestrian access connects retail spaces to Home for Soldiers’ Widows Medical Office Building

DATA:
- TOTAL LEASABLE SPACE: 18,715 sq ft
- PARKING SPACES: 57

Vacated alley
Continue Lake Street streetscape along 1st Ave.
The east side setback would be large enough for outdoor dining patios
A 20% Federal Historic Tax Credit is available for rehabilitating income-producing buildings. This dollar-for-dollar Federal income tax credit equal to 20% of the construction costs may be used by the building owner or syndicated to a tax credit investor. The minimum investment is 100% of the building’s “adjusted basis”; that is, the purchase price minus the land cost and depreciation, plus prior improvements. The building must be a certified historic structure, and the work must meet the Secretary of the Interior’s Standards for Rehabilitation. The program is administered by the Illinois Historic Preservation Agency (IHPA) and the National Park Service. Contact Carol Dyson at the IHPA: 217-524-0276, carol.dyson@illinois.gov

Cook County Class-L Property Tax Incentive
The Class L property tax incentive encourages the rehabilitation of landmark commercial, industrial, multi-family residential or non-for-profit buildings. Owners can have their property tax assessment levels reduced for a 12-year period provided they invest at least half of the value of the landmark building in an approved rehabilitation project. While the Class L incentive is a Cook County incentive program, the Village of Maywood must support granting the incentive.

RE: Maywood Home for Soldier’s Widows
224 N. 1st Avenue
Maywood – Cook County

Dear Mr. Kus:

We received a request for an assessment of the above property’s eligibility for nomination to the National Register of Historic Places.

We have reviewed the information provided to us and have evaluated the property in terms of the National Register criteria. Based on this review, we agree that the property may be eligible for listing in the National Register. Please refer to the attached eligibility assessment sheet for further details.

Please feel free to contact me at 217/782-8588 if you have any questions, and I would be happy to assist you.

Sincerely,

Amy Hathaway
National Register & Survey Specialist
We appreciate the opportunity to partner with the Village to provide these redevelopment options. We thank:
Michael Rogers, Maywood Village Trustee
David Myers, Assistant Village Manager
Angela Smith, Village Project Manager
Tom Kus, Chair, Maywood Historic Preservation Commission

We thank our collaborators at Vinci Hamp Architects and at Sullivan Goulette & Wilson for their pro-bono services to produce this study.

Report Preparation:
Sullivan Goulette & Wilson
Jeffrey P. Goulette
